

## **Request for Special Temporary Authority**

HC2 Station Group, Inc. (“HC2”) respectfully requests Special Temporary Authority (“STA”) to operate at the identified engineering parameters outlined in this application while it constructs a permanent broadcast facility for this Low Power Television (“LPTV”) station. The FCC has a history of granting such requests, particularly where, as here, the request is supported by good cause and granting it would further the public interest.<sup>1</sup>

Unique circumstances support this request. First, HC2 is operating in a resource-constrained environment due to the ongoing 600 MHz Incentive Auction repacking process. Station owners seeking to build new broadcast facilities currently have access to far fewer resources than they would have otherwise, a factor that the FCC and its bureaus acknowledged could become an issue when designing the repacking process to facilitate this “once-in-lifetime opportunity to expand the benefits of mobile wireless coverage.”<sup>2</sup>

Second, an STA may be necessary to avoid the inefficiency and waste associated with building a second, duplicative broadcast facility that can only be used for a short period of time. The station is in the process of facilitating the building of a permanent facility based off the parameters outlined in the Construction Permit: 0000025103.<sup>3</sup>

For these reasons, the Media Bureau should expeditiously grant HC2’s request for an STA to operate pursuant to the engineering specs outlined in the corresponding Engineering STA request.
