

Guenter Marksteiner  
WXDT-LP  
Legal STA  
November 2018

As the Commission is aware, low power television station WXDT-LP has been off the air pursuant to STA<sup>1</sup> while preparing for its transition to digital operation. WXDT-LP shares equipment with commonly-owned station WZDT-LP, which has been displaced from Channel 39 and received notice from T-Mobile to vacate that channel. As a result, both WZDT-LP and WXDT-LP had to go silent while work was done to prepare for the displacement of WZDT-LP to its new channel and transmitter location, and for WXDT-LP's transition to digital operation. It is respectfully requested that WXDT-LP be granted Special Temporary Authority to return to operation temporarily utilizing a channel 26 digital antenna installed at its transmitter site with a radiation center at 69 meters above ground level at 15 kW.
