

## **TECHNICAL SUMMARY**

Low Power Television Station K40KR-D  
Medford, Oregon  
Channel 20, 1.0kW ERP, 771.3 AMSL

This application is a Special Displacement Window application for K40KR-D, currently licensed for operation on Channel 40 in Medford, OR, Facility ID: 18240.

K40KR-D is eligible to file in the Special Displacement Window since it has been licensed and operating prior to April 13, 2017, and is on a channel that has been repurposed for use by 600 MHz Band wireless services.

An interference analysis for the proposed facilities was conducted using the FCC's *TVStudy* software.

The results show no interference either caused or received that exceed the FCC limits for protected facilities based upon current and post-transition environments.

A copy of the analysis is attached as an exhibit.
