

### Reason for STA

Licensee seeks special temporary authority to operate K22HJ-D on Channel 18 with 100 watts TPO (1.2 kW ERP). Licensee currently has a construction permit for Channel 18 as a result of the Commission granting a displacement application (File No. 0000054769) on June 22, 2018. The translator switched to Channel 18 to accommodate the station displacing the translator. However, Licensee is not yet able to operate at full power on Channel 18 due to pending equipment adjustments and module replacements. Licensee anticipates that it will be able to commence operations at full power in the next several weeks.
