

## Environmental Statement

K36LY-D

12/30/2018

The applicant proposes to operate at an ERP of 125 watts with a CL-1469B horizontally polarized log periodic antenna at a height above ground of 8 meters. This proposed is well within the FCC's guidelines for both controlled and uncontrolled exposure limits. Nevertheless, the site is fenced and placards warning of radiation hazard are posted in and around the site at all times. Also, station personnel are trained how to turn of the power to the transmitter in the event that any tower maintenance is required.
