

### **Request for Waiver**

Scripps is proposing displacement of low power television station KSAW-LD from channel 15 to channel 28 in Twin Falls, ID. The displacement is the result of predicted interference to the operational parameters of full power television station KPIF licensed on channel 15 in Pocatello, ID, as specified in KPIF's pending maximization application.

Scripps believes that KSAW-LD is an eligible displaced station because the KPIF maximization application was filed "as a result of . . . the repacking process" established by the Bureau. *See, Incentive Auction Report & Order*, 29 FCC Rcd. 6567, at ¶ 659. Should the Commission determine that KSAW-LD is not technically an eligible low power station, Scripps respectfully requests a waiver to participate in the Special Displacement Window because waiver would further the purposes of the *Incentive Auction Report & Order* as expressed in paragraphs 656-657 of that Order and would not be inconsistent with any express provision in the Order.
