

Special Displacement Window Application

LPTV or Translator Facility: WASA-LD Facility ID 167320 Port Jervis, NY
Licensed Ch. 25 File# BLDTL-20091222AQB

Nature of Displacement: Interference caused to WWOR-TV Repack Ch. 25 Secaucus, NJ
Interference received from WWOR-TV Repack Ch. 25 Secaucus, NJ
TVStudy Displacement summary in Table 1

Proposed Facility: Ch. 13 3 kW ERP directional (azimuth pattern in Figure 1)

Modification Compliance: 0.0 km from licensed site
Contour comparison in Figure 2
TVStudy Analysis report in Table 2
(Study cell size: 1.00 km Profile point spacing: 0.10 km)

Contingent Application Rule: Waiver of §73.3700(g)(2(i) requested
Operation on proposed channel will not commence until the following station discontinues operation on its current channel:
WNET Ch. 13 Newark, NJ (repacked to Ch. 12, phase 9)
The applicant will accept a corresponding special operating condition on the CP authorization.

RF Exposure: The transmitting antenna is atop the Four Times Square office building in New York City. The calculated signal density near the building at two meters above ground level attributable to the proposed facility is 0.7 percent of the general population/uncontrolled maximum permitted exposure limit. Calculations conducted pursuant to FCC OET Bulletin Number 65 and incorporate 100 percent relative field at downward angles (from antenna elevation pattern data).

Following construction of the proposed facility, the applicant will conduct RF exposure measurements at rooftop and upper level indoor locations to evaluate the level of RF exposure resulting from the proposed facility. As necessary, based on these results and considering all emitters, appropriate exposure abatement procedures will be established and followed, in order to comply with the FCC's exposure limits. Such abatement procedures may involve the restriction of access to certain areas and/or facility modifications to reduce RF levels.

Date **06 May 2018**
