

AMENDMENT TO FILE NO. 0000052801

Explanatory Statement regarding “Environmental Effects” Exhibit

An attachment to File No. 0000052801, originally filed on April 16, 2018, contains an Engineering Exhibit in which the subject of “Environmental Effects” is addressed. No amendment to the “Environmental Effects” information contained in the original Engineering Exhibit is proposed in this amendment. By way of explanation, this attachment is submitted with an amendment to other information contained in the Engineering Exhibit (attached separately) only because the Licensing and Management System (“LMS”) form requires an attachment regarding environmental effects.
