

WFEF-LD, Facility ID 182336, Orlando, FL
File No. 0000063304
DTV America Corporation

ACKNOWLEDGMENT OF MEETING SPECIAL CONDITIONS

Applicant hereby submits this acknowledgement that the construction permit preceding this application for License to Cover contained the following special condition: “Low power television is a secondary service, and that low power television and television translator stations must not cause interference to the reception of existing or future full service television stations on either allotted NTSC or DTV channels, and must accept interference from such stations.” Applicant states that such special condition has been met and will be observed during operation of WFEF-LD.

The construction permit also contained the following special conditions: “Prior to construction of the tower authorized herein, permittee shall notify AM Station(s) listed below¹ so that, if necessary, the AM station(s) may determine operating power by the indirect method and request temporary authority from the Commission in Washington, D.C. to operate with parameters at variance in order to maintain monitoring point field strengths within authorized limits.... Both prior to construction of the tower and subsequent to the installation of all appurtenances thereon, a partial proof of performance, as defined by Section 73.154(a) of the Commission’s Rules, shall be conducted to establish that the AM array has not been adversely affected and, prior to or simultaneous with the filing of the application for license to cover this permit, the results submitted to the Commission.” Applicant hereby states that no tower construction or modification was performed pursuant to the construction permit, and that the antenna was not replaced. Therefore no such notice to the referenced AM stations was required.

The construction permit also contained the following special condition: “Permittee shall be responsible for the installation and continued maintenance of detuning apparatus necessary to prevent adverse effects upon the radiation pattern of the AM station(s).” Applicant hereby states that the tower was already detuned at the time construction of the station began, making the installation requirement inapplicable. Applicant states that it will maintain the detuning apparatus during operation of WFEF-LD.
