

TECHNICAL SUMMARY

LOW POWER TELEVISION STATION WOIW-LD
LIMA, OHIO
CHANNEL 17 15 KW 402 M AMSL

1. The instant application is to modify the construction permit for WOIW-LD, Lima, OH (FCC File No. 0000051874). The purpose of the modification is to harmonize the WOIW-LD facility specifications with the antenna structure information for its supporting tower structure. There are no other substantive changes proposed except for a correction of geographic coordinates.
2. The antenna supporting structure for the WOIW-LD facility is authorized under FCC antenna structure registration number 1012894. This registration was modified on January 31, 2019 to reflect a small increase in overall structure height and a correction of geographic coordinates. There was no change in the tower site elevation.
3. The *TVStudy* interference analysis results are shown in an exhibit included with the instant application. As indicated, the proposed facility passes all interference requirements both caused and received for both the current and post-repack allocation environments.
