

Suspension of Operations on Translator W50DP-D/W36FE-D
During Channel Displacement

New Hampshire Public Broadcasting reports that W50DP-D has been off the air since March 1, 2019, when broadcasting ceased pursuant to notification from T-Mobile USA, Inc. that wireless operations were commencing in the Channel 50 spectrum. We plan to resume operations well within 30 days of the off-air date, on displacement Channel 36 under the reduced power STA granted in File No. 0000067834. We will notify the Commission when broadcasting resumes.
