

ENGINEERING EXHIBIT

Application for Minor Modification of Digital Low Power Television Station Construction Permit

prepared for

Gray Television Licensee, LLC
W22CY Clarksburg, WV
Facility ID 125359
Ch. 22 (digital) 15 kW

Gray Television Licensee, LLC (“*Gray*”) is the licensee of analog Low Power Television station W22CY, Channel 22, Clarksburg WV, Facility ID 125359 (BLTTL-20060120ADM). A Construction Permit (“CP”, BDFCDTL-20120329AOH) authorizes W22CY to flashcut to digital operation on its current Channel 22, at 1 kW effective radiated power (“ERP”) with a directional antenna. *Gray* herein seeks a minor modification of the flashcut CP to specify a different transmitting location, an increase in ERP to 15 kW, and use of a nondirectional transmitting antenna.

As proposed herein, W22CY will utilize the tower structure associated with FCC Antenna Structure Registration number 1034466, located 5.0 km from the W22CY licensed analog and flashcut CP site. The proposed W22CY antenna will be side-mounted on the tower and no change to the overall structure height will result.

The proposed antenna is an ERI model AL12O-22-E having elliptical polarization. The ERP is 15 kW using a “full service” out of channel emission mask. Figure 1 depicts the relevant coverage contours of the licensed analog facility (74 dB μ) and those of the current flashcut CP and proposed digital facilities (51 dB μ), demonstrating compliance with §73.3572 for a minor change.

Interference study per OET Bulletin 69¹ shows that the proposal complies with the FCC’s interference protection requirements toward all digital television, television translator, LPTV,

¹FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for*

and Class A stations (existing and post-auction). The results, summarized in Table 1, show that any new interference does not exceed the FCC's interference limits (0.5 percent to full power and Class A stations, and 2.0 percent to secondary stations) to any facility except with respect to W30CH which does not present a conflict for the proposal.

The licensed W30CH analog facility (BLTTL-20070319AAK, Ch. 30, Clarksburg WV, Fac ID 130131) would receive 11.8 percent new interference, which exceeds the 2.0 percent limit towards LPTV stations. *Gray* is also the licensee of K30CH and consents to interference exceeding 2.0 percent from the W22CY minor modification. As a practical matter, the interference will not actually occur because *Gray* intends to convert W30CH and W22CY to digital at the same time (no interference will occur from the proposed W22CY to the W30CH digital flashcut facility). Accordingly, the proposal complies with §74.793 regarding interference protection to digital television, low power television, television translator, and Class A television facilities.

Human Exposure to Radiofrequency Electromagnetic Field

The proposed facility was evaluated for human exposure to RF energy using the procedures outlined in the FCC's OET Bulletin Number. 65. Based on OET-65 equation (10) and 10 percent antenna relative field in downward elevations (pattern data shows less than 10 percent relative field at angles 30 to 90 degrees below the antenna), the calculated power density attributable to the proposed facility at locations near the transmitter site at a height of two meters above ground level is $0.7 \mu\text{W}/\text{cm}^2$, which is 0.2 percent of the general population / uncontrolled maximum permissible exposure limit. This is well below the five percent threshold limit described in §1.1307(b) regarding sites with multiple emitters, categorically excluding the applicant from responsibility for taking any corrective action in the areas where the proposal's contribution is less than five percent.

Evaluating TV Coverage and Interference, February 6, 2004 (“OET-69”). This analysis employed the FCC's current “TVStudy” software with the default application processing template settings, 1 km cell size, and 1 km terrain increment. Comparisons of various results of this computer program (run on a Mac processor) to the FCCs implementation of TVStudy show excellent correlation.

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from RF electromagnetic field exposure in excess of FCC guidelines. This exhibit is limited to the evaluation of exposure to RF electromagnetic field. No increase in structure height is proposed.

Section	Question	Response
Proposed Community of License	Facility ID	125359
	State	West Virginia
	City	CLARKSBURG
	LPD Channel	22

Section	Question	Response
Antenna Structure Registration	Do you have an FCC Antenna Structure Registration (ASR) Number?	Yes
	ASR Number	1034466
Coordinates (NAD83)	Latitude	39° 18' 02.0" N+
	Longitude	080° 20' 36.0" W-
	Structure Type	TOWER-A free standing or guyed struct
	Overall Structure Height	192.7 meters
	Support Structure Height	182.9 meters
	Ground Elevation (AMSL)	414.5 meters
Antenna Data	Height of Radiation Center Above Ground Level	98.8 meters
	Height of Radiation Center Above Mean Sea Level	513.3 meters
	Effective Radiated Power	15 kW

Antenna Technical Data	Section	Question	Response
	Antenna Type	Antenna Type	Non-Directional
		Do you have an Antenna ID?	
		Antenna ID	
	Antenna Manufacturer and Model	Manufacturer:	ERI
		Model	AL12O-22-E
		Rotation	
		Electrical Beam Tilt	1.25
		Mechanical Beam Tilt	Not Applicable
		toward azimuth	
		Polarization	Elliptical
	Elevation Radiation Pattern	Does the proposed antenna propose elevation radiation patterns that vary with azimuth for reasons other than the use of mechanical beam tilt?	No
		Uploaded file for elevation antenna (or radiation) pattern data	
		Out-of-Channel Emission Mask:	Full Service
