Attachments: Alton Ellis Email RE_ Interference - Tulsa OK.pdf

I just got a call from Alton Ellis at Total Radio Inc., who called to tell me that LPTV station KXAP-LD in Tulsa is stepping on several of his customers, including a local public safety, below channel 14. See the attached which indicates a string of emails from him in this regard. This should serve as a notice that the above station should immediately cease operation until a solution is purposed by the station that will resolve this interference problem.
