

K04RS-D  
Silent STA  
5/13/2019

K04RS-D is engineered to receive its input from KQRO-LD; however, there has been a problem receiving the input signal. Also, no wireless Internet provider has been found atop the Fremont Peak to provide an alternate feed method. Therefore, the applicant has taken K04RS-D silent and will file to move to one of the other two sites that cover the Salinas area, either Mt. Toro or Hidden Hills. A minor mod application will be filed within a week.
