

Application for Modification DTV Auxiliary Construction Permit FCC File No. 0000068333

The purpose of this minor change application is to increase the height of the KGO-TV post incentive auction Channel 12 auxiliary antenna authorized in the above-referenced Construction Permit. Due to structural considerations, the planned location of the KGO-TV Channel 12 auxiliary antenna had to be moved 2.7 meters (9 feet) higher on the tower. No further changes are proposed herein.
