

Extraordinary Circumstances Requiring STA

The WHIZ-DT, Ch. 40. License reflects se of a directional antenna. The actual antenna in use is non-directional. The discrepancy was discovered by a consulting engineer , and appears to be the result of an error in completing the engineering section of a license application in 2007. WHIZ-TV will be switching to Ch. 30 under the Commission's re-pack procedure, and is moving forward on the steps necessary to complete that channel change.

The purpose of the STA is to allow WHIZ-DT to continue to operate non-directionally on Ch. 40 as it has been doing for over ten years, until it moves to Ch. 30. The most recent STA grant was on December 20, 2018 (1800E1-MHH) and expires on June 20, 2019.
