

## **LICENSE CERTIFICATION**

### **VARIANCE FROM AUTHORIZED CONSTRUCTION PERMIT PARAMETERS**

#### **WMYD**

#### **DETROIT, MI**

Scripps Broadcasting Holdings LLC (Scripps), licensee of WMYD, has constructed a new full-service DTV facility for WMYD on Ch. 31 with parameters that match all of those listed on the construction permit (LMS File No. 0000034676) with the exception of the antenna.

The construction permit specifies a Dielectric TFU-23ETT-R CT3 antenna that is horizontally polarized only. The antenna installed by Scripps for the WMYD facility is a Dielectric TFU-23ETT/VP-R CT3 antenna that is elliptically polarized. Therefore, the polarization of the station is elliptical rather than horizontal as specified on the construction permit. The azimuth pattern of the antenna did not change and is identical the azimuth pattern authorized on the construction permit. Furthermore, the power in the vertical polarization does not exceed the power in the horizontal polarization in any azimuth.
