

Request for Extension of STA

NHPB seeks extension of the grant of special temporary authority in File No. 0000063744 for this displaced translator station to operate on CP Channel 36 at reduced power of 228 watts ERP while the licensee seeks funding to build out full CP facilities. Grant of extension would serve the public interest by allowing NHPB to continue to provide public service through the translator while preserving the opportunity to increase translator power and improve public service during the normal construction permit period.
