

Children's Television Programming Report
KOMU-TV
July 2019

Explanation of "Amendment"

The instant report was originally filed on April 5, 2019 to timely discharge the station's first quarter children's television programming reporting obligation. As such, the information in the report reflected the children's television programming aired by KOMU-TV during the First Quarter of 2019. However, as filed, the "Report Reflects Information For" blank erroneously indicated that the information contained in the report was for Second Quarter 2019, which was not yet complete and was inconsistent with the airdates of the programming reflected in the body of the report itself.

The LMS does not permit amendment of the "Report Reflects Information For" field. Therefore, to file its Children's Television Report for the Second Quarter of 2019, the station is simultaneously (1) transferring the information originally contained in this report to a newly created Children's Television Programming Report correctly designated as reflecting information for the First Quarter of 2019, and (2) amending the information in this report so that it reflects the programming that aired during the now-completed Second Quarter of 2019. It is noted that at all times, the information regarding the children's television programming aired by the station available to the FCC and the public via the LMS and the station's online public inspection file has been timely and accurate.
