**Re: Impact of ION Phase 6 Transition on Willis Tower**

Dear Jim:

Pursuant to conversations ION Media WCPX has had with Jeremy Ruck & Associates, Vertical Bridge and the Willis Tower team regarding the possibility that ION will complete its post-auction transition in Phase 6, rather than Phase 8. This letter is to confirm that the ION's transition in Phase 6 will not adversely impact the ability of Willis Tower to implement the repacking with respect to other television stations seeking to transition to their post-auction channels. As you know, Jeremy Ruck & Associates is working with the television stations with transmitting antennas located at Willis Tower and will have accomplished the repacking at Willis Tower through a variety of means, including the reconfiguration of the broadcast antennas. Presently, Willis Tower intends to have completed construction of facilities for all repacked stations' post-auction channels by the beginning of Phase 6 (by September 7, 2019). If you have any question, please contact Gustavo Figueiredo at 872-225-3660.

Sincerely,

A handwritten signature in blue ink, appearing to read "Bernard A. Borghei". The signature is written in a cursive, flowing style.
