

**Exhibit Relating to Renewal of FM Booster WWCU-FM1**

This exhibit is being included in WWCU's renewal application in order to ensure that the licensee's FM Booster Station WWCU-FM1, Cullowhee, NC (Fac. ID No. 165096) is including in the renewal process.

The "old" version of FCC Form 303-S that was available in the Commission's CDBS filing platform included a specific question about FM booster stations and required applicants with FM booster stations to identify the call sign, facility identifier, and location of any FM booster station that was co-owned and operated with the main facility. The current LMS-based version of the renewal application (FCC Form 2100, Schedule 303-S) does not request that information. Consultation with the Commission Staff revealed that FM boosters are automatically renewed with the corresponding main station and that a separate renewal for an FM booster is not necessary. The applicant is submitting this exhibit out of an abundance of caution to ensure that the renewal for main station WWCU will include the corresponding FM Booster WWCU-FM1.
