Public File Exhibit

Form 303-S

In the process of preparing for filing the renewal application, the licensee learned from its counsel that some of its issues programs lists should be revised and reformatted. The lists as initially drafted had been placed in the public file substantially on time with a few exceptions. The lists counsel recommended to be revised, however, replace those earlier lists and reflect more recent upload dates. Similarly, counsel recommended reformatting the licensee's 2018 Annual EEO Public File Report which was substituted for the report that had been timely posted.

At this time, all documents required to be uploaded are in the station's online public file.
