

CONSTRUCTED POST-AUCTION FACILITY

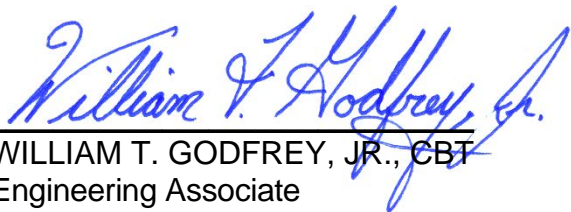

The WEUX-DT Channel 21 post-auction facility was built-out pursuant to the underlying construction permit (File No. 0000053767) with the exception that the antenna height radiation center is being corrected from the authorized height of 144.1 m AGL to the actual height of 143.9 m AGL as shown in the attached elevation view exhibit. The antenna manufacturer corrected the center of radiation in a later version of its electrical and mechanical data proposal (Proposal Number: C-70464-6). The 0.2 m reduction in height is being requested via this license application to cover the WEUX-DT Channel 21 post-auction construction permit pursuant to Section 73.1690(c)(1) of the FCC Rules (within the +2/-4 m tolerance) in lieu of a two-step process requiring a minor modification of construction permit application followed by a license to cover application. The F(50,90) 39.46 dBuV/m protected noise limited contour is essentially unchanged as can be seen in the map below.

WEUX-DT Channel 21 CP vs. WEUX-DT Channel 21 APP

CERTIFICATION

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998. Mr. Godfrey was a graduate from the University of North Florida and a Distinguished Military Graduate from the University of Florida. As a Professional in the field of Telecommunications he states under penalty of perjury that the information contained in this report is true and correct to the best of his knowledge and belief.
