

**FCC Form 2100, Schedule 303-S  
WQCS(FM), Fort Pierce, FL**

**Online Public Inspection File**

Indian River State College ("IRSC"), licensee of noncommercial educational radio station WQCS, Fort Piece, Florida, reports the following with regard to the timely placement of documents into the station's online public inspection file. Although the WQCS(FM) online public inspection file is now complete, IRSC inadvertently failed to timely transfer all existing items from its hard copy studio public files into the new online public file as of the March 1, 2018 deadline for noncommercial educational radio stations to complete that conversion. Notably, the 2012 through 2018 annual EEO public file reports for WQCS were not transferred or added to the online public inspection when required in 2018, but have all now been uploaded to the appropriate section of the online public file site.

In addition, IRSC notes that the 2018 FCC Form 323-E biennial ownership report for WQCS was filed on March 9, 2018 and added to the online public file at that time, a few days after the March 2, 2018 filing deadline. IRSC regrets the brief delay in the filing of that item, which was due to difficulties resulting from the changes in the FCC Form 323-E and its required data, as well as the change in the online filing process through the LMS site, all of which took effect for the first time with that filing deadline.

IRSC regrets the brief delays in the filing of these items in the new online public inspection file for WQSC(FM) in connection with changes in applicable filing requirements and procedures. However, IRSC has already fully remedied these oversights to ensure that its online public file is now complete with all required materials and, given the one-time nature of the procedural changes, does not believe that the issues are likely to recur. Accordingly, IRSC respectfully submits that its public file has been substantially compliant over the course of the current license term.
