

**RF Exposure Statement
WWOR Secaucus, NJ
Auxiliary Antenna Site – West Orange, NJ
Channel 25**

The facility proposed in this application will operate with an effective radiated power (ERP) of 527 kW and a center of radiation 98.5 meters above ground level (AGL). An analysis of the radiation levels at 2 meters AGL indicate that the RF exposure level would be well below the allowable limit for an uncontrolled area and therefore meets the requirements. It is also noted an evaluation of all known or proposed facilities for this site indicated that the total RF exposure level would also be below the allowable limit for an uncontrolled area. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
