

KRMZ, Steamboat Springs, Colorado  
Return to Operations

KRMZ rebroadcasts the signal of KRMA, Denver, Colorado, as delivered by satellite. The satellite service vendor, Comcast, changed satellites and changed its encryption/decryption encoding. The station went silent when this change occurred. KRMZ ordered a new satellite receiver, but upon delivery, KRMZ determined that the new receiver was not functional. The station has since received and installed the new unit. KRMZ now is able to receive the signal of KRMA and has returned to the air at its full licensed parameters.
