

Explanation Regarding Online Public Inspection File

On September 10, 2017, Hurricane Irma striking Key West resulted in WYBX going silent pursuant to special temporary authority (BLSTA-20170918ABI). WYBX resumed operations as of March 7, 2018, after repairs were completed.

WYBX, Key West, and WYBW, Key Colony Beach, duplicate the programs of WYBP, Fort Lauderdale, Florida. Certain programs listed on the issues and programs lists are broadcast on all three stations. During the period when WYBX was off the air, WYBP was on the air broadcasting its normal schedule of noncommercial educational programs. Inadvertently, issues and programs lists were uploaded to the WYBW and WYBX online public inspection files ("OPIF") because they were broadcast on WYBP.

In preparing this application for renewal of license, the licensee discovered the error and has uploaded corrected issues and programs lists to the OPIF.
