

STA Request
KUKR-LD
Santa Rosa RF 26
10/1/2019

The tower owner inadvertently took down the KUKR-LD transmit antennas and feedline. They got confused between the antenna used for KUKR-LD and the previous LPTV (K25HI) that operated before the Tubbs Fire destroyed the buildings at the site. While working through the process to get the transmit antenna and feedline reinstalled, the applicant requests the ability to operate at a lower height and at a lower power level.
