

## CONSTRUCTED POST-AUCTION FACILITY

The WTVW-DT Channel 22 post-auction facility was built-out pursuant to the underlying construction permit (File No. 0000034881) with the exception of the following:

- Antenna model changed from TFU-29JTH/VP-R 6T170 to TFU-29ETT/VP-R 3T170
- Antenna height radiation center increasing 0.8 m due to the antenna model change

The 0.8 m change in height is being requested via this license application to cover the WTVW-DT Channel 22 post-auction construction permit pursuant to Section 73.1690(c)(1) of the FCC Rules since the change is within the +2/-4 m threshold. The F(50,90) 39.56 dBu protected noise limited contour is essentially unchanged as can be seen in the map below and the attached TVStudy demonstrates that the slight height increase in radiation center will not result in impermissible interference to any station and the station will accept any inbound interference as a result of the slight height increase.

WTVW-DT Channel 22 CP vs. WTVW-DT Channel 22 License Application

**CERTIFICATION**

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998. Mr. Godfrey was a graduate from the University of North Florida and a Distinguished Military Graduate from the University of Florida. As a Professional in the field of Telecommunications he states under penalty of perjury that the information contained in this report is true and correct to the best of his knowledge and belief.
