Public File Materials

Discrepancy In Upload Location

Issues and Program lists were uploaded to the online public file when required. However, the files were uploaded to the “Public Affairs and News” folder, rather than to the “Issues and Programs” folder. After receiving an email from FCC staff, the station contacted the help desk, identified the problem, and moved the files to the “Issues and Programs” folder.

In addition, a report titled “Public files correction,” including the original email from the FCC, was uploaded to the FCC Investigations or Complaints folder.
