

Ownership Study

This ownership study is provided as an analysis for the aural broadcast markets formed by the modification of the WAUE(FM).CP 262A at Waverly, AL, FCC file no. BPH-20180912ABG. The following stations are included in the study:

WAUE(FM).CP Mod. 262A Waverly, AL, FCC Facility I.D. 198812

WFXO(FM) 252C3 Stewartville, AL, FCC Facility I.D. 704

WRFS(FM) 286A Rockford, AL, FCC Facility I.D. 190442

WSGN(AM) 1050 kHz Alexander City, AL, FCC Facility I.D. 60762

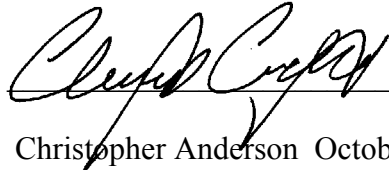

WYEA(AM) 1290 kHz Sylacauga, AL, FCC Facility I.D. 70638

None of the stations are located within a Nielsen rated market; as a consequence, the permitted common ownership is determined using the contour overlap methodology. The following exhibits include the city grade contours, 3.16 mV/m (70 dBu) (FM) and 5 mV/m (AM), of all stations intersecting any of the mutually overlapping stations, including noncommercial facilities, and exclude any stations with a transmitter site greater than 92 km from any portion of the mutually overlapping area, as well as any commonly owned stations which do not mutually overlap the defined market. The ownership markets are plotted and listed in the attached exhibits.

A reference plot (exhibit E-1) shows the WAUE(FM).CP modification has no overlap to the other commonly owned stations. As a result, the common ownership of these stations is permissible.
