

Online Public Inspection File Exhibit Amendment

In an abundance of caution to make the noncommercial educational FM Station WDAV renewal application ([File Number 0000079331](#)) more complete, the application's "Online Public Inspection File Exhibit" is hereby amended to reflect that the station's 2019 3rd quarter Issues/Programs List, due to be uploaded to the station's online public file by October 10, 2019, was uploaded a few days later on October 18, 2019. The reason for the late upload was the maternity leave absence of the station's Assistant General Manager responsible for the upload. As soon as the Assistant General Manager became aware of the missing post after her return to the station, the 3rd quarter List was uploaded right away.

Other than the late upload of the station's 2011 4th quarter List (which was previously reported to the Commission) and the late upload of the 2019 3rd quarter List (reported above), the station has had no other late Issues/Programs List online public file postings.
