

## **CHANGE IN UHF TV ANTENNA**

**WAWD-TV DISPLACEMENT CP CH 25 42 kW MAX DA FCC FILE NUMBER 0000034185**

**FORT WALTON BEACH, FLORIDA**

**NOVEMBER 2019**

**The WAWD application for CP specifies a PSI MODEL PSILPD16AH-25-CP, elliptically polarized, directional antenna. After the CP grant it was determined that an Alive Telecom model ATC-BCE312H-VP1-25, elliptically polarized, directional antenna, better met the station's needs. This is the installed antenna and its theoretical horizontal plane radiation pattern is equal to the pattern on file. Since the Alive Telecom antenna is equivalent it is respectfully requested that the license be issued specifying the Alive Telecom model number as shown in the license application associated with this application.**
