

PURPOSE OF POST-AUCTION ENGINEERING STA

The purpose of this Post-Auction Engineering STA application is to allow the WWL-DT facility to temporarily operate with alternate parameters on its post-auction channel (27) using a side-mounted directional interim antenna (TFU-24WB-R C160) while the new post-auction main facility continues to be built-out. The proposed WWL post-auction interim facility at reduced parameters will completely encompass its community of license with the F(50,90) 48.0 dBu principal community contour and will not exceed its authorized F(50,90) 40.05 dBu post-auction protected noise limited contour in any azimuthal direction (see showing below).

WWL-D27 Post-Auction CP vs. WWL-D27 Post-Auction Interim STA

CERTIFICATION
