

Explanation of Response to Online Public Inspection File Question

All pre-filing announcements were timely broadcast on the station. In preparing this application, it was discovered that the certificate of broadcast required by Section 73.3580(h) of the Rules was not timely uploaded to the online public inspection file ("OPIF") within 7 days following the last broadcast of the announcements. Immediately upon discovering the error, the licensee, on September 26, 2019, uploaded the certificate. The failure to timely upload the letter was an inadvertent oversight.

Also, some of the issues and programs lists were timely uploaded to the OPIF but were inadvertently uploaded to the incorrect folder in the OPIF. They have since been moved to the correct folder in the OPIF.
