

## Online Public Inspection File Exhibit

As of this date, documents required to be uploaded to the station's public inspection file have all been added to the station's online public file and have been uploaded at the times required to be posted, with one very minor exception, and that is the station's 2018 annual EEO Public File Report which was inadvertently posted on October 8, only a few days after the required October 1 date. The licensee's staff did post the EEO Report online on the station's website by the October 1 deadline, but because 2018 was the first year that public file online postings were required, the staff overlooked the required posting on the station's online public file. However, when the staff was made aware of the omission, the Report was uploaded to the online public file right away.
