

WDHP(AM) Online Public Inspection File

Reef Broadcasting, Inc. (Reef Broadcasting “), licensee of Station WDHP(AM), Frederiksted, Virgin Islands, (Facility ID No. 87117), cannot certify that it fully complied with the Commission’s online public inspection file (“OPIF”) rules. It is missing issues/programs lists (“Lists”) for the current license term. It should be noted that WDHP was unable to broadcast for over a year due to the damage suffered from Hurricane Maria.

Reef Broadcasting appreciates the requirement to create and maintain these Lists, however, the transition to online public files created significant administrative burdens for small stations like WDHP. Moreover, as the Commission knows, Hurricane Maria caused significant hardship for stations operating in the Virgin Islands. In addition to the immediate devastation of the storm, the clean-up and rebuilding efforts took months following the Hurricane and these efforts continue today. The chaos caused by Hurricane Maria further exacerbated the difficult administrative challenge of transitioning to the OPIF.

Going forward, Reef Broadcasting has put additional processes in place to ensure that it timely complies the Commission’s OPIF rules.
