

Exhibit 1
Online Public Inspection File Compliance

Southern Broadcasting Corporation (“Southern”), licensee of Station WENA (AM), Yauco, Puerto Rico, Facility ID No. 61257, cannot certify that all documents required by the Commission’s online public inspection file rules were uploaded. Southern does not have any issue/program lists in its online public inspection file. Southern appreciates the requirement to maintain an issue/program list and regrets that it has not yet uploaded its issue/program lists to the online public inspection file. Transitioning to the OPIF created a significant administrative burden for small stations like WENA. Moreover, as the Commission knows, Hurricane Maria caused significant hardship for stations operating in Puerto Rico, including dealing with clean-up and rebuilding efforts on the island for months after the storm. Going forward, however, Southern believes that the administrative burden of complying with the OPIF rules will be diminished with respect to uploading individual quarterly issue/program lists, as opposed to having to transition years of records. Finally, Southern has put in place additional processes to ensure that it timely complies the Commission’s OPIF rules.
