

K24FH-D Request for Technical STA

As the Commission is aware, on or about January 13, 2020, K24FH-D, Glide, Etc., OR (Facility ID No. 50585) was forced off the air because the station's tower fell as a result of ice accumulation. *See* LMS File No. 0000099022 (STA Request to Remain Silent, filed and January 21, 2020). K24FH-D is now applying for Special Temporary Authority to return to air and operate with a single Kathrein broadband UHF panel at 5 meters above ground level, with 20 watts ERP.
