

**RF Exposure Statement  
Temporary Antenna STA  
KTVU Oakland, CA  
Channel 31**

The facility proposed in this application will have an effective radiated power (ERP) of 470 kW and a center of radiation 257.1 meters above ground level (AGL). An analysis of the radiation levels at 2 meters AGL indicates that the RF exposure level is well below the allowable limit for an uncontrolled area and therefore meets the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
