

Two episodes of Earth Odyssey with Dylan Dryer that aired back-to-back on 12/28/2019 did not have the E/I bug up for the entire program. The first episode that aired at 9am CT did not display the E/I bug at all. The second episode that aired at 9:30am CT displayed the E/I bug for only the last five minutes. The program is usually comes from NBC with the E/I bug embedded on the entire episode, but that wasn't the case for these two episodes.
