

Radio Active Media, Inc. License Renewal Application

Public File Exhibit

The required documents were timely placed in the station's online public file and/or paper public file, as applicable, with one exception. That exception is that the station's issues/programs list for the first quarter of 2018, the first quarter that all such reports were required to be placed in the online public file, was posted in the online file on July 10, 2018, at the same time that the report for the second quarter of 2018 was posted. While the issues/programs list for the first quarter of 2018 was timely prepared, the station's staff simply was not accustomed to placing documents in the online public file and overlooked the need to do so until reminded at the time that the next one was due to be posted.
