

WFNI – Online Public File

Emmis Radio LLC License (Emmis) is committed to maintaining the online public inspection files for its radio stations in compliance with the Commission's rules. Based on Emmis' review of its Indianapolis stations' public files in preparation for filing the station renewal applications, Emmis has determined that, with respect to station WFNI, there appear to have been three (3) instances in which material pertaining to political advertising orders was not uploaded to the online public file within one business day (the material was uploaded between three (3) and eight (8) days from the request for time). Emmis is committed to training its personnel on the importance of compliance with the political file rules, and has redoubled its efforts in this area.

In addition, our review of the online public files indicates that issues/programs lists for each of the Indianapolis stations may have been uploaded late on approximately nine (9) occasions. Emmis is continuing its efforts to train staff on the importance of collecting all required public file information and uploading it promptly and will monitor the completeness and timeliness of its files closely going forward.
