

Online Public File Exhibit

Some documents were not timely uploaded to the station's online public file. Its 2018 EEO Annual Report was uploaded on December 10, 2018. Also, in the process of preparing this license renewal application, licensee undertook a review of the station's online public inspection file, including the political file. In order to make sure the political file was complete, licensee uploaded numerous documents, but many of those documents were already in the file, in files with other, related documents. (For example, invoices attached to orders.) Thus, the number of new documents uploaded does not indicate the number of missing documents. Some documents were missing until very recently, but the number is in the range of 25 percent of the total that should have been in the station's political file.
