

Engineering Statement - Amendment

CBS Television Licenses LLC

WJZ-TV(STA) Baltimore, Maryland

Facility ID 25455

Ch. 13 21.5 kW(Max-DA) 273 m

CBS Television Licenses LLC (ViacomCBS) proposes to install an interim antenna for WJZ-TV Baltimore, MD (the Station) for use when the primary antenna system is being replaced. The proposed facility will operate with a directional, horizontally-polarized antenna height 261 meters above ground level, 273 meters above average terrain (HAAT), and a maximum effective radiated power (ERP) of 21.5 kW. This Statement seeks to amend the requested expiration date to be consistent with the Phase 10 completion date of July 3, 2020.

ViacomCBS sought and received a *Request for Modification and Waiver of Phase Assignment* requesting to modify the post-incentive auction transition phase assigned to WJZ-TV from Phase 9 to Phase 10.¹ Therefore, we now seek to amend the pending request for Special Temporary Authorization of the Station's interim antenna on pre-transition channel 13 through the Phase 10 completion date as well.²
