

Environmental Statement
KQSL DTDRT
April 24, 2020

The applicant proposes to operate a horizontally polarized channel 23 digital translator at 6 meters AGL at a power level of 200 watts. This proposal is well within the FCC's guidelines for radiation exposure. Furthermore, the site is completely fenced. Nevertheless, the applicant will ensure that placards warning of radiation exposure will be posted in and around the site at all times. Also, station staff will be trained how to cease transmission in the event that anyone needs to climb the tower.
