207 Old Dominion Road
Yorktown, VA 23692

Application Reason/Purpose	Prior coordination notification
File Number	Shall be provided by applicant
Applicant Name	Addressee
Call Sign	WSVW-LD Massanutten – Channel 30 WHSV-TV-DR1 Massanutten – Channel 34 WSVF-CD Massanutten – Channel 36
Site Name or Loc	Massanutten Mtn
Nearest City/State	Harrisonburg, VA
N Latitude	38 23 34.8
W Longitude	78 46 11.9
Ground Elevation (m) / AGL (m)	890.6 / 27
Freq. Band (MHz)	466-572 MHz, Channel 30 590-596 MHz, Channel 34 602-608 MHz, Channel 36
Emission Designator	DTV
System Configuration	See attached "FEW - Final Engineering Worksheet"
Previous NRAO Coordination No.	NRQZ ID 11040, 12021
Current NRAO Coordination No.	NRQZ ID 12518_13MAR2020

Dear Applicant:

The National Radio Quiet Zone (NRQZ) has evaluated these facilities to determine the interference impact on our highly sensitive radio astronomy operations.

[NRAO Special Condition Statements + SGRS special condition statement:](#)

The National Radio Astronomy Observatory (NRAO), Green Bank, WV, objects unless the Applicant's license is restricted to an Effective Radiated Power (ERP) as noted below:

- 12518-01, operating on 566-572 MHz to 3.9 Watts at Azimuth 273.1 degrees True North, and
- 12518-02, operating on 590-596 MHz to 4.1 Watts at Azimuth 273.1 degrees True North, and
- 12518-03, operating on 602-608 MHz to 4.2 Watts at Azimuth 273.1 degrees True North

To meet this Special Condition, the Applicant shall:

1. Use the final engineering submitted by Joseph Davis, Chesapeake RF Consultants, indicating that all facilities meet the ERP restriction.
2. Arrange for the requested site inspection to verify the implementation of this Special Condition.
3. Post a copy of this document and associated attachments at the Transmit facility.
4. Provide a Construction Notification as defined by the FCC for your specific radio service.

Regulatory

The NRQZ Office requests that:

1. The FCC places the Special Condition on the Station License.
2. This Letter of Concurrence be attached to the FCC application.
3. The applicant provides the NRQZ Office with notice of its official filing with the FCC per section 47CFR1.924 (a) (2).

The National Radio Astronomy Observatory (NRAO) site located at Green Bank, Pocahontas County, WV, has no objection to this frequency assignment provided the special conditions are met.

Sugar Grove Research Station Special Condition

NOTE: Due to the COVID-19 pandemic, the Sugar Grove Research Station is unable to review or provide comment on this frequency assignment. Reviews will continue as soon as the facility resumes normal operations. In the meantime, it is possible, that at the direction of the FCC, this frequency assignment request may be granted prior to the completion of the coordination requirements to the National Quiet Radio Zone (47 CFR 1.924), specifically by the Sugar Grove Research Station, a DOD Communications facility, in Sugar Grove, West Virginia.

Therefore, operation of the facilities specified herein is at applicant's own risk and subject to modification upon review and comment of the Sugar Grove Research Station thus fulfilling the provisions of the coordination process of the National Quiet Radio Zones. On behalf of Sugar Grove facility, the NRQZ office can provide updated concurrences to the FCC as deemed necessary.

This letter constitutes provisional coordination of assignment in the National Radio Quiet Zone as required by the FCC Rules and Regulations 47CFR1.924.

If I may be of assistance, please feel free to contact me.

Sincerest regards,

Paulette W. Woody
NRQZ Office Administrator
PWW:pww

file: 12518.docx
Attachments: Three (3) FEW - Final Engineering Worksheet

NOTE:

The NRQZ office, operating under the NRAO – Green Bank Observatory's IDOS or Infection Disease Operating Status due to the COVID-19 pandemic, is unable to provide original signed concurrence letters.
If a paper copy is required to fulfill Regulatory Department coordination requirements, the applicant must make that request in writing and it will be honored once normal operations resume.

This concurrence remains valid provided the data contained within is consistent with the applicant's filing at the Commission. Any discrepancy in system parameters, such as geographical coordinates (Latitude, Longitude, AMSL), antenna height above ground level (AGL), antenna gains or directivity (orientation), channel (operating frequency or frequency bands), emission type, and power requires re-coordination. If the Commission has questions regarding the validity of this or any concurrence, please direct inquiries to nrqz@nrao.edu or 304-456-2107.
