

**FCC Form 303-S  
Online Public File Certification**

While the Station can confirm that it prepared and placed the required Annual EEO public file reports in its local public file on a timely basis, it has since discovered that in the transition to the FCC Online Public Inspection File (“PIF”) it failed upload the required EEO reports to the PIF for the 2017/18 and 2018/19 reporting periods. Upon realizing its oversight, the Station posted the historical EEO reports to the PIF on March 16, 2020. The Station regrets this inadvertent lapse in oversight and will institute a closer review and adherence to the required public file uploads.
