

WJHJ-LP
License Renewal Application
Minimum Operating Schedule and Operating Parameters

Since 2015 the station was operating at reduced power pursuant to special temporary authorization (LMS File No. 0000106552), although the STA was allowed to lapse for a brief period between July 2019 and the grant of a new STA in September 2019 due to a calendaring error.

On April 15, 2020, the station ceased operations in order to avoid interference with T-Mobile USA, Inc. facilities to be constructed on spectrum acquired in the broadcast incentive auction pending the station's relocation to a new channel pursuant to a displacement construction permit. Special temporary authorization for the station to remain silent was granted by the Commission in LMS File No. 0000112668.
