

### EEO PUBLIC FILE REPORTS:

All required Annual EEO Public File Reports were prepared and added to the station's paper-based Local Public Inspection File on a timely basis during the license term.

The station Online Public Inspection File was made available for public access on or before the March 1, 2018, deadline.

However, due to initial administrative confusion, it was only recently discovered that in uploading older material to the online public file, the station 2017 Annual EEO Public File Reports was inadvertently omitted from that process. This report was uploaded May 5, 2020.

To the best of our knowledge, all other matter was uploaded to the file on a substantially timely basis.

We take our obligation for maintaining a complete online public file seriously and regret this instance. We have implemented steps to confirm complete and timely document uploads in future.
